SUMMARY

CSE student with production experience delivering full-stack applications and managing self-hosted Linux infrastructure end-to-end. Built and shipped edge AI systems recognized in national competitions: comfortable owning code, deployment pipelines, and security controls on the same project.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, C++, Bash

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, GraphQL, Prisma ORM, NextAuth

Databases: PostgreSQL, MongoDB, SQLite, Redis

Infrastructure & DevOps: Docker, Kubernetes, Nginx, Proxmox (PVE), CI/CD Pipelines, Linux, Coolify

Security & AI: Vulnerability Assessment, System Hardening, RBAC, LLM/RAG, Edge AI, Agentic Workflows

EXPERIENCE

Full-Stack & DevOps Engineer (Part--Time) | **Neurootix** | Jul 2025 - Present | Dhaka, BD (Hybrid)

- Delivered end-to-end web applications (Next.js, Node.js, PostgreSQL) as primary engineer with full ownership from architecture to production.
- Hardened production environments through recurring vulnerability assessments and applied security controls across Docker, Nginx, and CI/CD pipelines.
- Rebuilt the company website with Next.js and Hashnode Headless GraphQL API; implemented structured routing, metadata, and SEO.
- Awarded Employee of the Month (December 2025) for infrastructure delivery and consistent engineering output.

Assistant Robotics Secretary | **NUBCC - NUB Computer Club** | Aug 2025 - Present | Dhaka, BD

- Led technical R&D for robotics and software projects; organized engineering workshops and mentored junior members in development fundamentals.

PROJECTS

Agentic VOICE AI -- Urban Transformation

Stack: LLM Orchestration, REST APIs | 2nd Runner-Up, Cognisor AI- Impact Dhaka 2026 AI Hackathon, BUET (3rd of 65 teams)

- Engineered concurrent agentic workflow execution with structured API logging and reliable database connection management under hackathon constraints.
- Coordinated multi-agent state to prevent race conditions and data inconsistencies across simultaneous AI process flows.

SMARTCLASS AI | github.com/md8-habibullah/smartclass-ai

Stack: Python, OpenCV, ESP-CAM, Edge AI | Bronze Medal, WICE 2026 National Round · Qualified: International Round, Malaysia

- Built a real-time student emotion and engagement analyzer using computer vision and edge inference, deployed without cloud dependency.
- Resolved a 10-second ESP-CAM to PC HTTP capture latency by reworking the image transfer pipeline to enable near-real-time analysis.

Ledger Tracker | ledger.habibullah.dev

Stack: React, WebAssembly, SQLite (WASM), IndexedDB

- Serialized a full SQLite relational database into IndexedDB via WebAssembly; persistent relational queries entirely client-side with zero server dependency.
- Eliminated external data exposure - all financial data stays local with no backend infrastructure required.

Vehicle Rental API | github.com/md8-habibullah/vehicle_rental

Stack: Node.js, Express.js, PostgreSQL

- REST API with RBAC enforcing Admin/Customer permission boundaries and automated pricing logic backed by PostgreSQL inventory management.

TECHNICAL WRITING

Published engineering articles on Dev.to covering full-stack development, infrastructure, and DevOps.
dev.to/md8_habibullah

AWARDS

- 2nd Runner-Up - Impact Dhaka 2026 International AI Hackathon, BUET (team "Dreams of X", 3rd of 65 teams)
- Bronze Medal - WICE 2026 National Round; "SMARTCLASS AI" selected for the International Round in Malaysia
- Employee of the Month - Neurootix, December 2025

EDUCATION

BSc in Computer Science and Engineering | Northern University Bangladesh | Dhaka, BD | 2024 - 2028 (Expected)
